

SF 799 - Startup Base Fertiliser

For Quality Tubers and Fruits

- Fast Response
- Long Lasting Delivery
- Nutrient Dense for produce Shelf Life
- Suited to Light and Heavy Soils
- Contains Beneficial Biology

Available in 25Kg, 1tonne Bbags , Bulk

SF799 is a unique mineral NPK fertiliser combining a complex blend of nutrients from Potassium Sulphate through to granulated Soft Rock Phosphate. This is enhanced with beneficial biology, including Mycorrhizal fungi and phosphorus solubalisers (*including Bacillus megaterium*).

Root stimulation is achieved through the use of natural ingredients including mineral based NPK, Humates and Phytohormone producing biology.

Tuber quality is enhanced though improved Phosphorus availability throughout the growing season, coupled with balanced Potassium, Calcium, Magnesium, Sulphur, Silica, Zinc and other Trace nutrients.

Vegetable 500+Kg/Ha in light soils
 1500+Kg in heavy soils

Potatoes 500—2500+Kg/Ha
